
Distant sources
Cosmological propagation
Milky Way
Sun
Earth
Detection
$V \propto g_D e' u\, n_{\rm eff}$
Z_D
$E_{\rm res} \approx m^2_{Z_D}/2m_\nu$
Cascade
Track
Double cascade
Power law, $z \lesssim 4$
Refraction; absorption on relic ν
Adiabatic; Galactic ν
Coherent near the Sun
Coherent in the Earth
HESE + through-going tracks
