
The Universe
Gigaparsecs
Sources, $z \leq 4$
Absorption on a relic ν
Decay:
$\nu_i \to \nu_j$ + mediator
Secondaries,
at lower energy
Scattering on
a relic ν
Milky Way
Relic neutrinos
Potential of the Universe's
electrons ($L_e - L_\alpha$)
The Milky Way
Kiloparsecs
Potential of its
stars and gas
Sun
Galactic neutrinos
Near the Sun
1 AU
Earth and Moon
Sun
Potentials of the
Sun, the Moon and
the Earth switch on;
flavor evolves
coherently
Inside the Earth
6371 km
Potential along
the chord
Mantle
Core
IceCube
